Bytes System is one of the growing and leading IT firm from Nashik, Maharashtra (India). We are powered by technical expertise, over 14 years of experience with state-of-the-art infrastructure & global clientele. The company is headed by young entrepreneurs with a prime goal to offer satisfactory technology solutions efficiently and cost-effectively.

We comprehend the innovation and life cycle of technology in this fast-paced Information Technology industry. Hence, we believe in investing more to upgrade our technology strengths and standards to keep ourselves one step ahead in the competition with all international standards. Our approach of learning new things at the right time and keeping ourselves updated with the current market trend has made us competent to serve our global clients with ease and satisfaction.

Bytes System was founded in 2007 by Ghanshyam Bagul. Primarily it was operated as an education firm providing high-quality training and education in computer and language studies. In 2009 company started its wing in software and website development. In 2011 company started to provide website hosting and email hosting solutions to its clients. In 2012 company started a separate wing for Android, Windows, and iOS mobile application development. As the huge demand of current situation in 2015 company started a new wing for SEO, SME, online marketing, and through this great journey company has successfully maintained its reputation with excellent and quality work.

We have been services clients for their website, software, and mobile development as well as online marketing requirements with some industry-leading and well-experienced IT experts and professionals. We have worked on several many diverse websites, software and mobile application development, and online marketing projects including Website Designing and Development, E-Commerce Development, B2B & B2C Portals, CMS Development, CRM Development, Android and iOS apps development, SEO, SME, Online Marketing, Digital Marketing, Google marketing, Facebook marketing.

Currently, we are providing our services in 15 cities across 5 states in India and UAE. We are working with our clients as digital partners to digitize their business processes and maximize profitability.

Our Vision

Bytes System strive to make technology more user friendly and efficient.

Our Mission

Provide our customers with best-in-class assistance to reach, develop, maintain and enrich global clientele with all our knowledge and expertise in Information Technology field.
